CONCLUSION

The conclusions that can be taken based on the results of research and discussion are, as follows:

- Garment designs like Saree and Blouse are a treasure to cultural heritage and storing them in the digital format will definitely a boon to the generations to come.
- The concept of 3D designing was widely acknowledged by all groups of people and hence this may serve as replacement for the catalogs used in the retail showrooms, textile / garment manufacturers.
- The design library will enrich the knowledge of the fashion design students and may serve as an effective teaching aid in the near future. Computer illiterates and computer professionals were immensely pleased with the concept and are looking forward to view in the retail shops in the future.
- The storage of library in the digital format will definitely help the future generation to view the rich and cultural heritage of Indian garment styles and traditional Indian fabrics.

Recommendations

- The 3D designing may be reproduced with movements in the fabric and the human model for a naturalistic presentation.
- This concept can be applied for other women's garments, men's garments and children's garments.
